

# Pan.a.ce.a

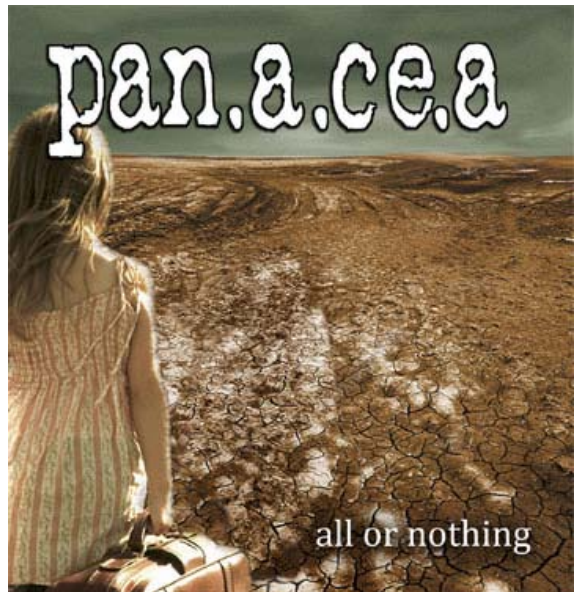

## **All or Nothing**

Remixed, re-mastered and enhanced

### **Melodic Hard Rock**

from the former "best unsigned band" in the country  
(Rock On Request Magazine 2007)

**Release date: February 17, 2009**

Pan.a.ce.a has only been around for a few years, but for this immensely talented young band, that's long enough to sell thousands of CDs on their own and be crowned best regional band more than once in the local press.

Based in Northeastern-Pennsylvania, Pan.a.ce.a performs regularly in the cities, rural areas and college towns throughout PA and beyond. Their first EP, *Anodyne*, released in 2005, was soon followed by the original version of *All or Nothing*. Combined the 2 releases sold 5,000 copies – not bad for an indie band selling CDs at shows and on consignment at a few FYE and Gallery of Sound stores. Their ever growing and loyal fan base has been looking forward to the next album, but first the band has a surprise for them – this new version of *All or Nothing*. After touching up the existing recordings and adding a couple songs (fan favorites from very early releases), then remixing and re-mastering, this album is sure to please current fans as well as many more hard rockin' music lovers across the country.

- **Produced by Bret Alexander** (Breaking Benjamin, The Badlees)
- **Voted best regional band/album** several times.
- **Sponsorships** with Scott USA & Jagermeister
- **Killer live show, enthusiastic fan base, developing street team and strong Internet presence**
